SKILLS SUMMARY–

- **Programming Languages:** JavaScript, TypeScript, C++, SQL
- **Front-end:** ReactJS, Redux Toolkit, Tailwind CSS, Bootstrap
- **Back-end:** NodeJS, Express.js, WebSockets
- **Databases:** MySQL, PostgreSQL, MongoDB
- **CS Fundamentals:** Operating Systems, DBMS, OOPS
- **Tools :** Git , GitHub, Docker, Postman

EDUCATION

Bhagwan Parshuram Institute of Technology

Delhi, India

Bachelor of Technology – Information Technology; CGPA: 8.1

July 2023 – June 2027

Courses: Software Development Fundamentals, Data Structures and Algorithms, oops–

PROJECTS

- [Scribble Kit](#) [Live Link](#) | [GitHub](#)
 - Designed a real-time collaborative whiteboard application **WebSockets** enabling multiple users to draw simultaneously on a shared canvas with instant synchronization.
 - Implemented **JWT-based authentication** and Supported 20+ concurrent users per room with real-time synchronization. collaboration, allowing authenticated users to create or join shared rooms where drawing events are broadcast in real time to all connected participants.
 - Reduced drawing latency through efficient canvas synchronization.
 - **Tech Stack :** TypeScript , ExpressJs , NodeJs , PostgreSQL, Zod , React , WebSockets.
- **Job_Assist** [GitHub](#)
 - Built the application using **Next.js and TypeScript** with a scalable full-stack architecture.
 - Built AI Assisted job application app. Streamlining the process of job application.
 - Implemented **Redis** for caching and performance optimization. and reducing API response time by 90%.
 - Added **API rate limiting** using Redis to protect backend endpoints from excessive requests
 - Integrated the **Gemini API** to provide AI-powered assistance for tasks such as resume improvement and job-related content generation.
 - **Tech Stack :** TypeScript , NextJs, ExpressJs , NodeJs , Redis, PostgreSQL, Zod
- [Reelify](#) [Live Link](#) | [GitHub](#)
 - Developed a full-stack video-sharing platform using the **MERN stack, Redux Toolkit, Firebase and JWT Authentication**, and **Supabase Storage**, and enabling users to upload, browse, search, and stream videos.
 - **Tech Stack :** MongoDB , ExpressJS , React , Supabase, FireBase.

ACHIEVEMENTS & COURSES

- Solved 470+ problems on LeetCode (1600+ rating) and CodeChef and actively participated in rated contests.
- Did a Cloud Computing Course from winnovation learning about CI/CD pipelines , Docker , AWS(Fundamentals)
