Delhi, India | 98vansh98@gmail.com | +91-9289498696

[Portfolio](#) | [GitHub](#) | [LinkedIn](#) | [LeetCode](#)

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, C++, SQL
- **Frontend:** React.js, Redux Toolkit, Next.js, Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express.js, REST APIs, WebSockets
- **AI Integration:** OpenAI Realtime API, Gemini API
- **Databases:** MongoDB, PostgreSQL, MySQL, Redis, Prisma
- **CS Fundamentals:** Data Structures & Algorithms, OOP, Operating Systems, DBMS
- **Tools & Platforms:** Git, GitHub, Docker, Postman, AWS(EC2)

PROJECTS

Job Assist — AI-Powered Voice Interview Platform

[GitHub](#)

- Built a full-stack AI interview platform on Next.js and TypeScript, enabling candidates to take live, voice-based mock interviews conducted by an AI interviewer.
- Engineered real-time voice interviews using WebRTC peer connections with OpenAI's Realtime API, streaming live audio and transcript events through a WebRTC data channel, with proper connection and media cleanup on session end.
- Designed a resume-aware interview engine: parsed uploaded resumes (Cloudinary + pdf-parse) and combined them with the job description to dynamically prompt the AI interviewer with candidate-specific, adaptive follow-up questions.
- Implemented Redis caching and API rate limiting for high-traffic endpoints, cutting average API response time by 30%.
- Dockerized the application and deployed it using containerized services for consistent, repeatable deployments.
- **Tech Stack:** TypeScript, Next.js, Node.js, WebRTC, OpenAI Realtime API, Redis, PostgreSQL, Prisma, Docker

Scribble Kit — Real-Time Collaborative Whiteboard

[Live Demo](#) | [GitHub](#)

- Engineered a real-time collaborative whiteboard supporting 20+ concurrent users per room with WebSocket-based synchronization, broadcasting drawing events with sub-second latency across all connected clients.
- Implemented JWT-based authentication and room-scoped authorization, allowing users to securely create or join shared drawing sessions.
- Optimized canvas rendering and event batching to reduce drawing latency, ensuring smooth synchronization at scale.
- **Tech Stack:** TypeScript, React, Node.js, Express.js, WebSockets, PostgreSQL, Zod

Reelify — Full-Stack Video Sharing Platform

[Live Demo](#) | [GitHub](#)

- Developed a YouTube-style, full-stack video-sharing platform on the MERN stack, enabling users to upload, browse, search, and stream video content.
- Implemented JWT and bcrypt-based authentication with Redux Toolkit and redux-persist for secure, persistent session state.
- Integrated Supabase and Firebase storage for scalable media upload and delivery.
- **Tech Stack:** MongoDB, Express.js, React, Node.js, Redux Toolkit, Supabase, Firebase

EDUCATION

Bhagwan Parshuram Institute of Technology

Delhi, India

Bachelor of Technology — Information Technology; CGPA: 8.1

July 2023 – June 2027

- Relevant Coursework: Software Development Fundamentals, Data Structures and Algorithms, Object-Oriented Programming

ACHIEVEMENTS & CERTIFICATIONS

- Solved 500+ DSA problems and achieved a 1600+ contest rating, ranking in the top 20% globally.
- Completed a Cloud Computing certification course (Winnovation) covering CI/CD pipelines, Docker, and AWS fundamentals.
